
Physical Control Options

303.1 PURPOSE AND SCOPE

This policy provides guidelines for the use and maintenance of physical control options that are described in this policy.

303.2 POLICY

In order to control individuals who are violent or who demonstrate the intent to be violent, the Pittsfield Police Department authorizes officers to use department-approved physical control options in accordance with the guidelines in this policy and the Use of Force Policy. The Chief of Police may also authorize other positions or individual department members to use specific physical control options.

303.3 ISSUING, CARRYING, AND USING CONTROL DEVICES

Physical control options described in this policy may be carried and used by members of this department only if the tool has been issued by the Department or approved by the Chief of Police or the authorized designee.

Only those members who have successfully completed department-approved training on this policy and the use of any physical control option are authorized to carry and use the tool.

Physical control options may be used when a decision has been made to control, restrain, or arrest a person who is violent or who demonstrates the intent to be violent and the use of the tool appears reasonable under the circumstances. When reasonable, a verbal warning and opportunity to comply should precede the use of these tools.

303.4 RESPONSIBILITIES

303.4.1 SHIFT COMMANDER RESPONSIBILITIES

The Shift Commander may authorize the use of a physical control option by selected department members who may not currently be issued or carrying the tool or those in specialized assignments who have successfully completed the required training.

303.4.2 TRAINING DIVISION RESPONSIBILITIES

The Training Division shall control the inventory and issuance of all department-approved physical control options and ensure that all damaged, inoperative, outdated or expended control options or munitions are properly disposed of, repaired or replaced.

Every physical control option will be periodically inspected by the Training Division or the designated instructor for a particular option. The inspection shall be documented.

The Training Division should keep accurate records on all issued physical control options including an inventory control, maintenance and inspection record.

Physical Control Options

The Training Division shall establish procedures to develop and maintain a list of department-approved physical control options and munitions, including type and specification (e.g., brand, type of weapon or munition, caliber if applicable) and include the list in the Authorized Control Devices section below.

The Training Division shall ensure the inventory control process includes a record for each control option and munition approved by the Department for official use and a record of all control options and munitions assigned to members by member name and serial number.

303.4.3 USER RESPONSIBILITIES

All normal maintenance, charging or cleaning shall remain the responsibility of personnel using the various control options.

Any damaged, inoperative, outdated or expended control options or munitions, along with documentation explaining the cause of the damage, shall be returned to the Training Division for disposition. Documentation shall also be forwarded through the chain of command, when appropriate, explaining the cause of damage.

303.5 TEAR GAS GUIDELINES

Tear gas may be used for crowd control, crowd dispersal, or against barricaded suspects based on the circumstances. Only the Shift Commander, Incident Commander, or Special Response Team Commander may authorize the delivery and use of tear gas, and only after evaluating all conditions known at the time and determining that such force reasonably appears justified and necessary.

When practicable, fire and emergency medical services personnel should be alerted or summoned to the scene prior to the deployment of tear gas to control any fires and to assist in providing medical aid or gas evacuation, if needed.

303.6 OLEORESIN CAPSICUM (OC) GUIDELINES

As with other control options, OC spray and pepper projectiles may be considered for use to bring under control an individual or groups of individuals who are engaging in, or are about to engage in, violent behavior. Pepper projectiles and OC spray should not, however, be used against individuals or groups who merely fail to disperse or do not reasonably appear to present a risk to the safety of department members or the public.

303.6.1 OC SPRAY

Uniformed members carrying OC spray shall carry the device in its holster on the equipment belt. Plainclothes and non-field members may carry OC spray as authorized, in accordance with the needs of their assignments or at the direction of their supervisors.

Physical Control Options

303.6.2 PEPPER PROJECTILE SYSTEMS

Pepper projectiles are plastic spheres that are filled with a derivative of OC powder. Because the compressed gas launcher delivers the projectiles with enough force to burst the projectiles on impact and release the OC powder, the potential exists for the projectiles to inflict injury if they strike the head, neck, spine or groin. Therefore, personnel using a pepper projectile system should not intentionally target those areas, except when the officer reasonably believes the suspect poses an imminent threat of serious bodily injury or death to the officer or others.

Regardless of where on the body it occurs, if a person is struck by the pepper projectile system, they shall be brought to a medical facility for evaluation as soon as practicable. This does not include persons that are only affected by the OC powder, and not struck by the projectile.

Officers encountering a situation that warrants the use of a pepper projectile system shall notify a supervisor as soon as practicable. A supervisor shall respond to all pepper projectile system incidents where an individual has been hit or exposed to the chemical agent. The supervisor shall ensure that all notifications and reports are completed as required by the Use of Force Policy.

Each deployment of a pepper projectile system shall be documented fully in the officers report. This includes situations where the launcher was directed toward an individual, whether or not the launcher was used. Unintentional discharges shall be promptly reported to a supervisor and documented in a report. Only non-incident use of a pepper projectile system, such as training or a product demonstration, is exempt from the reporting requirement.

303.6.3 TREATMENT FOR OC EXPOSURE

Persons who have been sprayed with or otherwise affected by the use of OC should be promptly provided with clean water to cleanse the affected areas. Those who complain of further severe effects shall be examined by appropriate medical personnel.

303.7 POST-APPLICATION NOTICE

Whenever tear gas or OC has been introduced into a residence, building interior, vehicle, or other enclosed area, the owners or available occupants should be provided with notice of the possible presence of residue that could result in irritation or injury if the area is not properly cleaned. Such notice should include advisement that clean-up will be at the owner's expense. Information regarding how and when the notice was delivered and the individuals notified should be included in related reports.

303.8 KINETIC ENERGY PROJECTILE GUIDELINES

This department is committed to reducing the potential for violent confrontations. Kinetic energy projectiles (eg. 12 guage less-lethal rounds, 37/40mm impact rounds), when used properly, are less likely to result in death or serious physical injury and can be used in an attempt to de-escalate a potentially deadly situation.

Pittsfield Police Department

Policy Manual

Physical Control Options

303.8.1 DEPLOYMENT AND USE

Only department-approved kinetic energy munitions shall be carried and deployed. Approved munitions may be used to compel an individual to cease his/her actions when such munitions present a reasonable option.

Officers are not required or compelled to use approved munitions in lieu of other reasonable tactics if the involved officer determines that deployment of these munitions cannot be done safely. The safety of hostages, innocent persons, and officers takes priority over the safety of individuals engaged in criminal or suicidal behavior.

Circumstances appropriate for deployment include but are not limited to situations in which:

- (a) The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved munitions.
- (b) The suspect has made credible threats to harm him/herself or others.
- (c) The suspect is engaged in riotous behavior or is throwing rocks, bottles, or other dangerous projectiles at officers, other department members, and/or other people.
- (d) There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.

303.8.2 DEPLOYMENT CONSIDERATIONS

Before discharging projectiles, the officer should consider such factors as:

- (a) (a) Distance and angle to target.
- (b) Type of munitions employed.
- (c) Type and thickness of subject's clothing.
- (d) The subject's proximity to others.
- (e) The location of the subject.
- (f) Whether the subject's actions dictate the need for an immediate response and the use of control devices appears appropriate.

A verbal warning of the intended use of the device should precede its application, unless it would otherwise endanger the safety of officers or when it is not practicable due to the circumstances. The purpose of the warning is to give the individual a reasonable opportunity to voluntarily comply and to warn other officers and individuals that the device is being deployed.

Officers should keep in mind the manufacturer's recommendations and their training regarding effective distances and target areas. However, officers are not restricted solely to use according to manufacturer recommendations. Each situation must be evaluated on the totality of circumstances at the time of deployment.

The need to immediately incapacitate the suspect must be weighed against the risk of causing serious injury or death. The head and neck should not be intentionally targeted, except when the officer reasonably believes the suspect poses an imminent threat of serious bodily injury or death to the officer or others.

Physical Control Options

If a deployment of a Kinetic energy projectile takes place, and a person is actually hit by the projectile, the person shall be brought to a medical facility for evaluation as soon as practicable.

303.8.3 SAFETY PROCEDURES

Shotguns specifically designated for use with kinetic energy projectiles will be specially marked in a manner that makes them readily identifiable as such.

Officers will inspect shotguns and projectiles at the beginning of each shift to ensure that the shotguns are in proper working order and the projectiles are of the approved type and appear to be free from defects.

When they are not deployed, shotguns will be unloaded and properly and securely stored in police department vehicles. When deploying a kinetic energy projectile shotgun, officers shall visually inspect the kinetic energy projectiles to ensure that conventional ammunition is not being loaded into the shotgun.

Absent compelling circumstances, officers who must transition from conventional ammunition to kinetic energy projectiles will employ the two-person rule for loading. The two-person rule is a safety measure in which a second officer watches the unloading and loading process to ensure that the weapon is completely emptied of conventional ammunition.

303.9 TRAINING FOR PHYSICAL CONTROL OPTIONS

The Training Coordinator shall ensure that those members who are authorized to carry a control option have been properly trained and certified to carry the specific tool and are retrained or recertified as necessary. Before being authorized to carry any control option, members will be given access to and receive training on this policy. Each member shall acknowledge that he/she has been provided access to and has had the opportunity to review, and understand this policy.

- (a) Proficiency training shall be monitored and documented by a certified, control option, weapons, or tactics instructor.
- (b) All training and proficiency for control options will be documented in the member's training file.
- (c) Members who fail to demonstrate proficiency with the control option or knowledge of the Use of Force Policy will be provided remedial training. If a member cannot demonstrate proficiency with a control option or knowledge of the Use of Force Policy after remedial training, the member will be restricted from carrying the control option and may be subject to discipline.
- (d) Retraining or recertification should occur annually, or as otherwise required by the Municipal Police Training Committee.

303.10 REPORTING USE OF PHYSICAL CONTROL OPTIONS

Any application of a control option shall be documented in the related incident report and reported pursuant to the Use of Force Policy.

Physical Control Options

303.11 BATON /PR-24/CONTROL DEVICE GUIDELINES

The need to immediately control a suspect must be weighed against the risk of causing serious injury. The head, neck, throat, spine, heart, kidneys, and groin should not be intentionally targeted except when the officer reasonably believes the suspect poses an imminent threat of serious bodily injury or death to him/herself or others.

When carrying a baton, uniformed personnel shall carry the baton in its authorized holder on the equipment belt. Plainclothes and non-field personnel may carry the baton as authorized and in accordance with the needs of their assignments or at the direction of their supervisors.
